A new look at Blessed Trinity
building and grounds:

MONDAY, April 27, 7:00 p.m.

FROM THE "SITE VISIT REPORT" OF MR. KEN GRIESEMEIR, Liturgical Design Consultant, commissioned by Blessed Trinity last November 2014 to evaluate the Blessed Trinity Building and Grounds in light of a variety of significant impending needs:

"The existing church building which serves Blessed Trinity Catholic Community provides a simple but appropriate setting for the worship of the parish. Its flexibility and intimacy are great advantages. It is obvious that great care has been exercised in the placement of the liturgical furnishings, art, and seasonal environment to enhance the experience of prayer in the space. With some simple but well-coordinated measures, the church building can become even more welcoming and unique, extending hospitality to the surrounding community. By bringing a greater sense of harmony and unity to the liturgical furnishings, by including technological advancements in sound and lighting, by resolving the most troublesome functional issues, and by including new artwork and devotional opportunities in the building, it can serve the faithful of the parish for years to come.

It is well worth carefully planned care and attention at this stage of its life."

The Blessed Trinity Building and Grounds have many needs which must be attended to. At this gathering the full "Site Visit Report" will be presented, as well as the needs and priorities determined by our Parish Finance and Pastoral Councils and Parish Staff.
