

Worship Space LIGHTING project begins November 4, 2019.

As determined and accepted at several of the full parish meetings, this will entail a complete replacement of the lighting system in the worship space (existing wiring will be utilized). This will include a dimmable and programmable system in order to accommodate the various demands of liturgical prayer.

The system will also be designed in accord with the planned “revisions’ in the worship space as determined at the full parish meetings.

COST OF THIS PROJECT: At the November 18, 2018 full parish meeting the cost estimates for worship space lighting was presented as \$60,050. Actual cost will be \$59,277.

This project will be funded from our parish savings account, but will be included as a part of our coming Capital Campaign for the project.

During the lighting project the worship space will continue to be available for weekend Masses, funerals and other major liturgical events, but daily Mass (on Wednesdays and Thursdays) will be celebrated in the chapel.

The project is anticipated to be completed by December 1, 2019.

LET THERE BE LIGHT!
